TRAIL D-VISE

The word epiphany commonly means "A moment of sudden revelation or insight," among other things. When I saw the Trail D-Vise I had one of those, and knew you needed to know about it as well. My aging forehead is getting more of a slope to it the older I get, due to me slapping it with my palm saying things like, "Oh, that's how it goes!" or "Oh, NOW I understand," or "Gee, why didn't I think of that?" So that slapping sound you heard was me, making my forehead even more Neanderthal-like and repeating that last line — again.

The Trail D-Vise (catchy name if you ask me) simply slips into your truck's receiver hitch, pins in with its own pin, and the handy vise handle slips off the side and goes over the nut-like head. You twist away and lock whatever the problem at hand is in your now, rock-like vise and go to work. It has toothed pipe jaws, and even a little anvil to pound on. It opens to just over 8" wide (to press most u-joints) and the main jaws have "Slip-Not" material so you don't lose your work. The shaft going into the hitch is cross-drilled so you can change it to 90-degrees if you need to, and it works in any common 2" receiver.

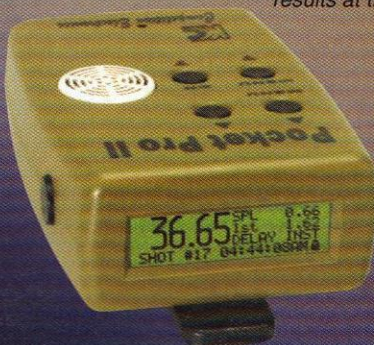

Now honestly, how many times could you have used this while off-roading, in the pasture, at the cabin or in our case, maybe at the range to fix or install something on a problematic gun bit? Use it to repair, fabricate, weld, file, hacksaw or just about anything you need a vise to do. Hell, it even has a built-in bottle opener, if that doesn't beat all. I put it on Suzi's Ford F-250 Super Duty beast and tried out a DMT diamond sharpener on my battle-worn kindling splitter right after taking this picture. It worked just fine. About \$150, and worth twice as much (or four, or five or ten times as much?) in some situations you've been in, I'll bet. Plus, it'll make your tool-hog neighbor envious. Get the Edge with Products from Competition Electronics

Improve your shooting with one of our shot timers or chronographs, used by top shooters and trainers worldwide.

Todd Jarrett

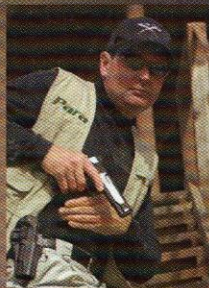

"The Pocket Pro is the fastest way to see results at the range."

Pocket Pro II Shot Timer

\$129.95 Part # CEI-4700 (blue)
Part # CEI-4705 (tan)

Records draw, reload, and shot interval times. Easy to use menu system. Backlit graphics display can be configured 3 ways. Large sturdy belt clip. Low frequency buzzer. Ergonomic design. 9 volt battery level indicator. Settable delay, stop tone, sensitivity, shot dead time, clock, backlight.

Pocket Pro Carry Case

\$10.95
Part # CEI-4707

ProChrono Digital Chronograph

\$119.95 Part # CEI-3800

Measures the velocity of your loads to verify their performance, a must when you need to shoot accurately! Accuracy- within 1%. Range of operation- 25 to 7000 ft/sec. Mounts on a camera tripod. 9 volt battery powered (not included). Review of shots, high, low, extreme spread, and standard deviation. Accessories available.

See our website for more fine products and special offers.

Our products are backed by a 30 day money back satisfaction guarantee, 2 year warranty, full service and support.
