# HIT PARADE

WHAT'S HOT FROM THE PURVEYORS OF MOTO MERCHANDISE

## ◀ MAC'S CUSTOM TIE-DOWNS TRAIL D-VISE

"The Trail D-Vise was born on the trail. One of our crew had a parts failure. Despite several toolboxes full of wrenches, not one of us had anything that could substitute for a bench vise. I started thinking about a hitch-mounted vise. Now the Trail D-Vise includes a built-in wrench, pipe jaw and, of course, a bottle opener."—Mac's Custom's Colin Maclemore.

## TM DESIGNWORKS FACTORY EDITION #2 CHAIN GUIDE ▶

"Many OEM chain guides are susceptible to wear and side impacts. Our material has memory flex to absorb impacts and spring back. If a customer hits something hard enough to break it, we have a one-year prorated warranty. The old model was wider for stoutness. This one is a little sleeker, but it can still run Baja no problem."—TM Designworks' Mark Miller.

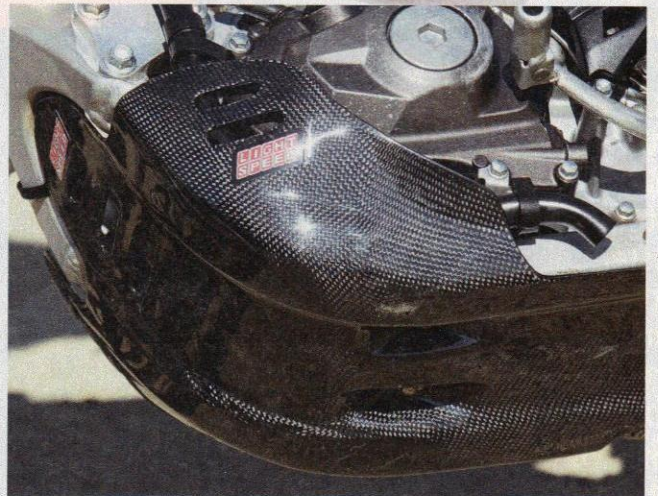

**\$89.95—[www.tmdesignworks.com](http://www.tmdesignworks.com) or (541) 772-4161.**

## ▲ EPIC HIGH DEFINITION CAM

"We're really excited about the launch of the new High Definition (HD) Camera. It was important to retain the streamlined design and simple-to-use interface that was our signature throughout the entire Epic line. The HD records in stunning 1280x720 definition and has crisp, clear audio. The footage we have collected so far has turned out amazing."—Epic's Doug Mann.

**\$279.99—[www.epicstealthcam.com](http://www.epicstealthcam.com) or (877) 269-8490.**

## ▲ LIGHTSPEED FACTORY GLIDE PLATE AND CASE GUARD

"Our Factory Protection glide plate offers added protection over a conventional glide plate, integrating the case guards with a conventional-style glide plate. It's form-fitted and designed to flex with the frame. The open design allows access to the clutch for maintenance and prevents mud from getting trapped."—LightSpeed's Willy Amaradio.

**\$199.95—[www.lightspeedperf.com](http://www.lightspeedperf.com) or (714) 990-5767.**
