## Quick-Release Fire Extinguisher Bracket Mounts in RVs

By: RV PRO Staff  
Wednesday, December 14, 2011

Mac's Custom Tie-Downs has introduced the Quick-Release Fire Extinguisher Bracket for use in RVs and other vehicles. The bracket was designed to quickly release a fire extinguisher from its mount by lifting an aircraft-style ball detent pin, according to the company.

The bracket, made in the United States, features a CNC machined billet aluminum construction and stainless steel hardware, according to Mac's Custom Tie-Downs. It's available with tubular or panel mounts for use on roll bars, cages, floor pans or motorhome interiors. The tube mount fits tubing in four sizes: 1.25 inches, 1.5 inches, 1.75 inches and 2 inches. More tube mount sizes are coming soon, according to the company.
