The new Trail D-Vise from Mac's Custom Tie Downs, features a cross-drilled design to allow it to be used horizontally or vertically.

In addition, the upgraded version includes pipe jaws and slip-resistant jaw faces along with an integrated handle and bottle opener. The vise opens to more than 8 inches, giving users shop-vise capability in all remote locations.

The upgraded Trail D-Vise is a portable, rugged vise that slides in a 2-inch hitch receiver.

The Trail D-Vise is designed for fabrication, welding, cutting, pressing, and straightening. It retails for \$159.95.
